

PRODUCT DATASHEET

Accessories for primary connectors

EFLA Lock

The reusable EFLA Lock secures the connection when connectors are connected together or to transformers. EFLA Lock makes the connection resistant up to 25 kg pulling force.

Protection Hat

An open connector should be protected against water and dirt. The protection hat is an easy way to protect your assembled connectors before transformer installation.

Reinforced Lock

The reinforced lock is a stronger option for the normal EFLA Lock. It is secured with screws and makes the connection resistant for pulling force up to 50 kg.

Primary Connector Adapter

Solves the problem of making simple primary installation in limited space by allowing the male and female connector to be assembled in a 180° angle. The unit complies with FAA-L-823 styles 2 and 9 wiring 8.3 mm², AWG8, 5 kV. The order code is KDCA.U-29.
